

Specialties

- Wellness
- Traumas
- Pain Management
- Fertility
- Stress
- Common Cold
- Fatigue

Expertise

- Addiction
- Allergies
- Anxiety
- Arthritis
- Asthma
- Back Pain
- Bell's Palsy
- Blood Pressure
- Breathing Problems
- Cancer support for nausea - reduces impact of chemo and radiation, helps rebuild the body post treatment
- Cholesterol
- Chronic Fatigue
- Cosmetic Acupuncture
- Facial Rejuvenation
- Depression
- Diabetes
- Eating Disorders
- Emotional and Physical Trauma
- Eye Problems
- Facial Acupuncture
- Feet
- Fibromyalgia
- Headache

- Healing
- Infertility
- Migraine
- Menopause Issues
- Muscle Aches
- Natural Healing
- Neck Pain
- Orthopedics
- Pediatric
- Pre and Post Surgery Strengthening
- Pre and Post Chemo Strengthening
- Pregnancy: Beautiful Mother, Beautiful Baby Trimester Patterns
- Sexual Dysfunction
- Shoulder Pain
- Sleep Disorders
- Smoking and Other Habits
- Spinal Problems
- Weight Loss

Treatment Techniques

- Cupping
- Gua Sha
- TuiNa
- Amma Therapy
- Herbal Medicine
- Herbs
- Moxibustion
- Qigong
- Color Light
- Tuning Forks
- Non-pharmaceutical Audio-Visual Entrainment (AVE) and Cranial Electrotherapy Stimulation (CES) to optimize brainwave activity. Supports relaxation and mental focus based on proven brainwave entrainment technology.
- Non-E- stim Advanced Manaka principle-based mat.
- BioMat : Combines negative ions, detoxifies pollutants and the nervous system; infrared rays promote health, relieve pain, reduce stress and speed recovery.
- Energy exercises for the promotion and maintenance of optimal health.
- Scalar Wave: Soft laser crystal spectrum technology. Scalar wave cold laser light for energy and Hz frequencies.
- Trinfinity algorithmic technology that harmonizes patterns which awaken vibrational changes.
- Evox voice mapping.
- Vector: Diagnostic system based on a non-linear scan spectral analysis of conductivity, transmission and /reception of signals that drive the electromagnetic

fields found in all organisms, providing full analysis of the patient's health and pathological symptoms. The Vector explores the yin yang balance, magnetic polarities, and/or the separation of the polarities, which would distort or impair the transmission and reception of signals and therefore weaken an organism or an area /organ within the organism.

- Poly-contrast Interference Photography (PIP): Biofield imaging captures a static, full color image of the biofield of a person or object for pre and post session.
